INTRODUCTION

Elevate is a proudly Australian owned furniture brand dedicated to providing quality and long lasting lift chairs to support our customers and their needs. Founded by a team with over 40 years of collective experience in the furniture industry, Elevate is stocked in leading furniture retailers across Australia. For more information, please visit www.elevatefurniture.com.au

WHAT IS A LIFT CHAIR?

A lift chair is a chair that is designed with a powerful lifting mechanism. Through a simple touch of a button the entire chair lifts up from its base, allowing the user to comfortably transition into a standing or sitting position with ease.

WHO IS A LIFT CHAIR FOR?

Looking just like a regular recliner, a lift chair provides valuable assistance to anyone who has difficulty transitioning from a seated to standing position. With a simple touch of a button, a lift chair gently rises and moves forward, allowing the user to stand with ease and avoid undue muscle strain.

A lift chair is ideal for individuals who have trouble sitting or standing due to health issues.

LIFT CHAIR MOTOR OPTIONS

A lift chair has a motor which enables the chair to have its lifting motion. Lift chairs traditionally come with one of two motor options: single motor or dual motor. Put simply, the more motors the lift chair has, the more options are available to the user.

Single Motor

A single motor lift chair has one operation panel that controls both the back recline and footrest and lift simultaneously.

Dual Motor

A dual motor lift chair has independent controls for the back and leg rest, meaning they can be moved independently. This allows for an infinite amount of seating and reclining positions to be enjoyed.

WHAT OUR CUSTOMERS SAY

"We purchased a lift chair for my elderly mother-in-law as she was nervous about her limited mobility. She is thrilled to now be able to move in and out of her seat unassisted (thanks to the easy-to-use lifting mechanism). It's been wonderful to see how such a simple function has restored her confidence, not to mention the peace of mind we now have knowing she is safe when we're not around" – Mel

HOW TO SELECT A LIFT CHAIR

STEP 1: DECIDE ON THE PURPOSE AND GENERAL USE OF THE CHAIR

The first critical step is to determine what type of lift chair you require: single motor or dual motor.

STEP 2: SELECT THE RIGHT SIZE FOR YOU

Size is a key factor in selecting your lift chair as the lift chair will need to fit the user's body.

The following checklist should be noted when determining your best lift chair fit:

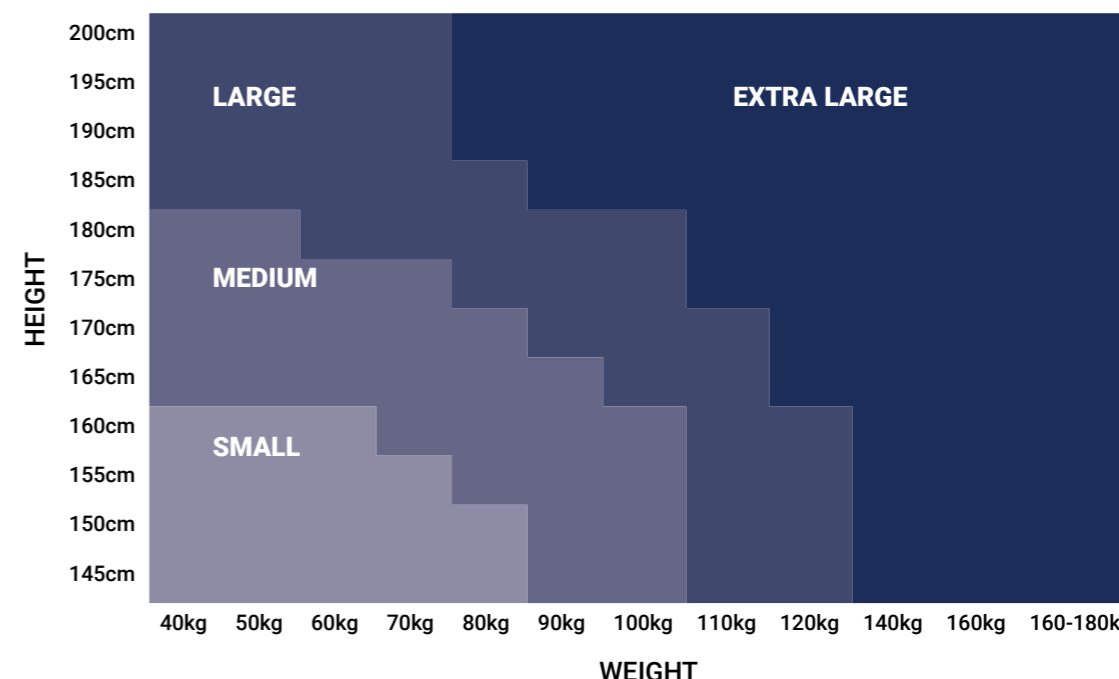

- Check the size rating of a lift chair to ensure it corresponds with the user's height and weight. Lift chairs range from small to extra large
- Check the weight capacity of the lift chair
- A comfortable lift chair fit allows the user's feet to rest on the floor when they are sitting upright with their back against the backrest of the chair.

- The seat should be wide enough to accommodate the user's hips at their widest point.
- If the user has long legs, consider a lift chair which provides added length to the footrest to help comfortably support their entire ankle and foot.
- Check the measurements of the proposed area that the lift chair will be placed in, to ensure that it will accommodate the lift chair, especially when it is in its full recline position
- Double check if the user requires any special features such as an adjustable headrest, swivel base, castors, tall back, or wide seating. We have conveniently listed all the product specifications for our lift chair models on pages 18-19.

STEP 3: CUSTOMISE YOUR LIFT CHAIR

Consider what textile and color will best complement your lifestyle and home décor. At Elevate, we provide a range of fabric and leather options.

CHAIR SIZING GUIDE

LYTLE

SINGLE MOTOR LIFT CHAIR

- Small size chair
- Single motor
- Leg extension and reclining mechanism simultaneous
- Soft padded arms for added comfort

- Lower lumbar cushioning for extra support and comfort
